There were also engineering controls put in place from 1968 to 1971 (the factor of 2 issue). You should probably acknowledge that in the memo but state that it is not relevant to this new approach and will be incorporated separately in the construction of the JEM.

Subject: Revised memo

I had the equation wrong for computing the a2 and a3 terms.

This memo has it right.

I am not sure that level of detail needs to be in the memo, but I wanted to check the calcs so we could show Linda how to set up the model.
